

>> Aiming for Net Zero

Speaker Series

May 12, 2016 at 7:00 pm

At the Ecology Action Centre
2705 Fern Lane, Halifax

Keith Robertson

M.ARCH., NSAA, LEED AP BD+C

Keith has been involved in the construction industry since 1981 and his dedication to all things green motivates him to continually design and build better. Of note, Keith is Nova Scotia's first LEED(R) accredited professional and has acted as LEED consultant on Atlantic Canada's first registered LEED (Leadership in Energy and Environmental Design) Green Building for CFB Stadacona. Solterre has since consulted on more than thirty residential, commercial, institutional, and healthcare projects in Atlantic Canada that have achieved LEED certification, with many more in the works. Keith has considerable technical experience in a variety of building types and construction methods. He worked for seven years as an architectural technologist in Alberta before upgrading his education to a Master of Architecture degree at the Technical University of Nova Scotia in 1992. In his graduate studies Keith performed extensive research on the environmental impact and health impact of construction materials. His research has continued in his professional experience. From his graduate studies at the School of Architecture Keith has developed a database of environmental construction materials, and a proprietary material assessment method. He has presented at more than thirty conferences, seminars, and industry groups.
