

## Ecology Action Centre – Candidate Survey 2024

### Candidate for Councillor, District 14 – Hammonds Plains - Upper Hammonds Plains - Lucasville - Middle & Upper Sackville

**Name of Candidate: Ed Giles**

1. The [Halifax Green Network Plan](#) (HGPN) should be used to guide the region's growth, but full implementation of the plan requires resources and enforceable rules to protect important greenspace and wildlife corridors. Will you support the full implementation of the HGPN to protect the Green Network? Explain why or why not (optional).

**Yes but I would like to examine any proposals within and decide accordingly.**

2. Will you commit to ensuring Halifax Transit attracts and retains enough staff to implement the Bus Rapid Transit (BRT) network and ferry routes in the [Rapid Transit Strategy](#)? Explain why or why not (optional).

**No. I would like to completely review the plans and budget before committing to anything.**

3. Will you commit to implementing the [Road Safety Strategy](#) and achieving its vision of zero injuries and fatalities across all modes of transportation? Explain why or why not (optional).

**No. I will need a complete information package to review before I can commit to anything. That said, whatever reduces injury and saves lives deserves attention.**

4. Are you committed to ensuring the continued implementation and full funding of the [JustFOOD Action Plan](#) as the municipality's first comprehensive, long-range food strategy, which will increase collaboration across levels of government and among community partners, strengthening our collective capacity to build a just, healthy, and sustainable food system. Explain why or why not (optional).

**Yes.**

5. With climate change wreaking heat waves even in temperate climate zones, and the price of home-heating fuel spiking due to global conflict, access to affordable home energy efficiency has become a human right crucial to comfort and standard of living. Cities across Canada are seeing tenants mobilize for these rights. As an elected official, would you

support a "right to efficiency" by-law supporting tenants' rights to affordable energy efficiency support? Explain why or why not (optional).

**No. Landlord have little control over what utilities the tenants miss- manage. Good tennants usually have great landlords.**

6. There are multiple stressors on local freshwater quality and quantity such as increased development and an increase in water-related climate events (e.g., floods, droughts, storms). Do you commit to advocating for and supporting watershed level management in municipal planning? Explain why or why not (optional).

**Yes.**

7. Will you, in the absence of a provincial Coastal Protection Act, advocate for and work towards passing municipal by-laws designed to address development on vulnerable coastal properties and infrastructure? Explain why or why not (optional).

**Yes. I already have done some and look forward to achieving more.**
