

## Ecology Action Centre – Candidate Survey 2024

### Candidate for Councillor, District 8 – Halifax Peninsula North

**Name of Candidate: Evyeneia Dexter**

1. The [Halifax Green Network Plan](#) (HGNP) should be used to guide the region's growth, but full implementation of the plan requires resources and enforceable rules to protect important greenspace and wildlife corridors. Will you support the full implementation of the HGNP to protect the Green Network? Explain why or why not (optional).

**Yes. I believe in sustainable connected communities and feel this is a positive step to achieve this.**

2. Will you commit to ensuring Halifax Transit attracts and retains enough staff to implement the Bus Rapid Transit (BRT) network and ferry routes in the [Rapid Transit Strategy](#)? Explain why or why not (optional).

**Yes. We absolutely need to increase and improve our transit and transportation systems.**

3. Will you commit to implementing the [Road Safety Strategy](#) and achieving its vision of zero injuries and fatalities across all modes of transportation? Explain why or why not (optional).

**Yes. I believe in evidence based decisions, to spend where it shows to have the most benefit. As a parent of a young child I will always support measures to create safer roads.**

4. Are you committed to ensuring the continued implementation and full funding of the [JustFOOD Action Plan](#) as the municipality's first comprehensive, long-range food strategy, which will increase collaboration across levels of government and among community partners, strengthening our collective capacity to build a just, healthy, and sustainable food system. Explain why or why not (optional).

**Yes. Access to healthy food is essential for a healthy and sustainable community.**

5. With climate change wreaking heat waves even in temperate climate zones, and the price of home-heating fuel spiking due to global conflict, access to affordable home energy efficiency has become a human right crucial to comfort and standard of living. Cities across Canada are seeing tenants mobilize for these rights. As an elected official, would you support a "right to efficiency" by-law supporting tenants' rights to affordable energy efficiency support? Explain why or why not (optional).

**Yes. In principle, I support this, and as a councillor would need more information and details of this by law to ensure that it lands within municipal jurisdiction, and that it treats all people fairly.**

6. There are multiple stressors on local freshwater quality and quantity such as increased development and an increase in water-related climate events (e.g., floods, droughts, storms). Do you commit to advocating for and supporting watershed level management in municipal planning? Explain why or why not (optional).

**Yes. These events will only continue if we do not.**

7. Will you, in the absence of a provincial Coastal Protection Act, advocate for and work towards passing municipal by-laws designed to address development on vulnerable coastal properties and infrastructure? Explain why or why not (optional).

**Yes. I will advocate towards passing by laws to address this.**
